## Feature Appendix

---

Defines the scope boundary for the product. Every feature is explicitly categorized to prevent scope creep and force prioritization decisions upfront.

### Must Do

Features that are essential for launch. Without these, the product does not solve the core problem.

- FEATURE — RATIONALE
- FEATURE — RATIONALE
- FEATURE — RATIONALE

### Should Do

Features that meaningfully improve the product but are not launch-blocking. Candidates for fast follow-up.

- FEATURE — RATIONALE
- FEATURE — RATIONALE

### Won't Do

Features explicitly excluded. Naming what you won't build is as important as naming what you will — it prevents scope creep and clarifies the product's identity.
